

Personal Directive

Instructions and Document
Long Form

A Personal Directive is a personal document, not legally binding in Massachusetts, in which you give your Health Care Agent (“Agent”), family, doctors and care providers information about what’s important to you and instructions about the kind of care you want and do not want. Accidents and illness can happen at any age. If you become unable to make or communicate health care decisions for yourself, even for a short time while you recover, your Agent can use this document to communicate your care choices to your family and care providers, and make health care decisions on your behalf. If you have not chosen an Agent yet, this document offers first-hand information to your family, doctors and care providers about your care choices.

Instructions: To create a Personal Directive, print this document and place the instructions page and the blank document in front of you. Write in what you’d like others to know about your values, beliefs, care goals and choices. If more space is needed, write on the back. If questions don’t apply, just leave them blank. You can update this document as often as you like, as long as you are competent.

On the first line print your full name in the blank space, followed by your address. Check the box that applies about your Agent. If you have a Health Care Proxy you can attach it to this document.

I. My Personal Preferences, Thoughts and Beliefs

- Let others know what’s important to you in order to make decisions on your behalf. Write in anything you like to help your Agent and family get you the care you want respecting your personal values, beliefs and choices, and to manage your personal affairs while you recover or longer.

II. People to Inform about My Choices and Preferences

- List the names of family, friends and others you’d like your Agent to inform and/or take action.

III. My Medical Care: My Choices and Treatment Preferences

- **Current Medical Condition:** Share information about the care you want as you recover.
- **Life-Sustaining Treatments:** Cardiopulmonary resuscitation, artificial ventilation/breathing, and artificial hydration and nutrition are life-sustaining treatments intended to prolong life by supporting an essential function of the body, when the body is not able to function on its own. Talk to your doctor about the specific risks, benefits and possible outcomes of attempting these treatments given your medical outlook. Check the box or write in your thoughts and instructions.

IV. My Religious, Spiritual, Cultural & Personal Considerations

V. Notes on a Peaceful Death

VI. Funeral Arrangements and Ceremonies

VII. Other Information, Instructions and Messages for Others

- Instructions for managing your personal affairs and messages to deliver to others.

VIII. SIGNATURE and Date

- Sign your full name and fill in the date you sign it. You can revise reaffirm this document.

Important: Keep the original and give a copy to your Agent, family and anyone else you would like. You can make changes or add information all through your life, as long as you are competent. Read more about the Personal Directive at www.honoringchoicesmass.com
